

Live From New York Important Download Tips:

- Make sure the songs line up properly in your Itunes.
(Kevin Casey Intro, Live From New York, Deep Cover '98, ect...)
- If they do not, just click the “Album” tab at the top of the playlist, and that will put all the songs in order.
- If the songs are overlapping during transitions in Itunes, change your playback settings. Itunes > Preferences > Playback > Uncheck Crossfade Songs.
- If you are burning Live From New York to a CD, you should download the WAV files, which are available on the blog post.
- Before burning, make sure that you select the option for no spacing between songs.
- **IMPORTANT:** Proper track order and a gapless album are essential for the intended listening experience.
